Re: Proposed Cape Haze Wastewater Expansion Program

Dear Property Owner:

The CCU survey results regarding the wastewater program for the Cape Haze community have been calculated. Forty seven (47%) percent of the property owners responded to the survey. The responses were 18 in favor and 122 against with a total of 158 not responding to the survey.

Based upon these results, the meetings to date have provided the basic wastewater program information to the Cape Haze neighborhood and are now concluded due to lack of majority interest. However, if any property owner or group of property owners wishes to approach CCU about getting an extension of services to their property(s), we are always open to discuss the cost for that extension. There are existing connection points on both the northern end and southern end of Placida Road that could be used.

One issue that was discussed to some extent but not in great detail was the possibility of reclaimed water service for irrigation purposes. As with the wastewater program, reclaimed water could be provided to all or portions of the Cape Haze community via either the Cape Haze Drive access or the southern access at Gaspar Drive. If there is interest, CCU would welcome the opportunity to discuss this matter at more length. Reclaimed water service would, however, involve both wastewater and reclaimed water services together.

CCU expresses our appreciation to everyone for their involvement and allowing us the opportunity to inform every one of the wastewater options available. CCU is always available at anyone's convenience to answer any other questions and provide additional information as needed.

Sincerely,

Bruce R. Bullert, P.E.
